

## Milan Miodrag Jovanovic

May 21, 1952 - October 9, 2018

Milan M. Jovanović passed away peacefully on Tuesday, October 9, 2018, in Durham, North Carolina, USA, surrounded by his family. Milan was born in Belgrade, Yugoslavia, on May 21, 1952, and completed his elementary and high school education in Jagodina, Yugoslavia. He received a Dipl.-Ing. degree in Electrical Engineering from the University of Belgrade, Yugoslavia, in 1976, an M.S. from the University of Novi Sad, Yugoslavia, in 1983, and a Ph.D. in Electrical Engineering from Virginia Polytechnic Institute and State University (Virginia Tech) in Blacksburg, Virginia, in 1988.

Milan was on the faculty at the Institute for Power and Electronics at the University of Novi Sad from 1976 to 1983. From 1983 until 1991, he was with the Virginia Power Electronics Center (VPEC) at Virginia Tech as a doctoral student and Research Scientist. Since August 1991, he was with Delta Electronics (Americas) Ltd., the U.S. subsidiary of Delta Electronics, Inc., Taiwan, one of the world's largest manufacturers of power supplies, where he held the position of Senior Vice President for Research & Development.

For over 40 years, Milan innovated more efficient ways of supplying electrical energy to information technology devices with smaller size and weight, from smart phones to data centers of major internet companies such as Google and Facebook. He led research teams in developing numerous power supply techniques, which are used in hundreds of millions of devices made by Delta Electronics and other manufacturers, enabling further miniaturization of electronics equipment and resulting in enormous cumulative energy savings and electronic-material waste reduction. Our world is a greener place thanks to Milan's work.

Milan was always ready to share his tremendous knowledge and experience. He was very active in the Institute of Electrical and Electronics Engineers (IEEE) and continuously encouraged his co-workers and all power electronics engineers to grow professionally through free and critical information exchange. He is the most cited industry-affiliated power electronics researcher in the world. He received numerous professional awards, he was a Fellow of IEEE, and was elected to the U.S. National Academy of Engineering in

2015 “for outstanding contributions to energy savings by efficiency improvements of ac-dc power supplies in information technology systems.”

Milan was an open-hearted, enthusiastic, welcoming, and humorous gentleman, who enjoyed his many friends, neighbors, co-workers, and colleagues around the world. They all loved him and were eager to be led by him because he always put their welfare and advancement above his own. His outstanding ability to notice the simplest everyday events and comment on them with his special sense of humor made life more memorable for everyone who knew him.

Milan is survived by his wife, Mirjana; daughter, Maria; and son, Max.

A memorial service followed by a reception will be held on Saturday, October 20, from 11:00 a.m. to 2:00 p.m., at Delta Power Electronics Laboratory, 5101 Davis Drive, Research Triangle Park, NC 27709. To attend, please RSVP to [Lezley.Kennison@deltaww.com](mailto:Lezley.Kennison@deltaww.com). Milan will be laid to rest in Belgrade, Serbia, at a later date.

In lieu of flowers, donations may be made in Milan's memory to the American Cancer Society, or to a cancer research organization of your choice.

“ I was very shocked and sadden to learn that my friend Milan passed away. He was such a kind person. In 1991 he took time from his Thanksgiving holiday and invited me to visit Delta Lab in Blacksburg, VA. Milan was one of the smartest and brilliant researchers. I still remember him talking about how the power electronics industry moved forward with flyback converter at one of CPES conferences. We will remember you and miss you, Milan. Rest in peace.

“ Milan was someone who grew on me. His direct Serbian way of speaking was at first a bit of a shock hard to, but getting to know him over the years I grew to love and respect him. We had times together in German, Raliegh Asia and in Belgrade for both business and pleasure. He was always fair, generous and kind and for me great support.

“ I was shocked to learn of his passing just now and wished to offer my condolences to his family. Our paths crossed during my Master's studies at Virginia Tech between 1985-1987. He was always kind and helpful and very down to earth, approachable person. I am saddened by his passing and my prayers with his family.

“ I had the honor of acting as Milan's patent attorney since early 2000 protecting many of his inventions around the world. He was kind and considerate when working with me and his co-inventors. His technical abilities and attention to details were superb and he contributed greatly to various aspects of power systems technology. I feel lucky for the opportunity to have worked with him.

“ It's really so sad to hear Dr. Milan passed away. I can't believe up to now that I had lost one of the best friend, colleague I ever met in Delta. In the past three decades, with his professional expertise and intelligence in power electronics , Dr. Milan who help us to win a lot of businesses from our competitors and build up such a great position in power industry. We all love you and giving our respect to you very much ! We all miss and appreciate you forever.

“ I was shocked and sadden to hear just yesterday of Milan's passing. While at Delta before I retired, I have always enjoyed meeting and conversing with Milan at work and even off-work at the local Cary, NC Fresh Market grocery where my wife & I met Milan & his wife shopping a few times. Milan was a friendly, warm and approachable person who always has kind words to exchange. I will miss him whenever I visit Delta RTP.

My deepest condolences go to his family during this challenging time.

Attached is a photo of Milan & I on my last workday of Jan 4, 2016 at Delta before

retirement that I will always treasure.

“ Hello Milan family  
I am so sadden by the news.  
He was a good friend and a brilliant technologist.  
He and I worked for more than 10 years but his friendship continued even after I left Delta.  
Please accept my condolences and let me know if there is anything I can do.  
God bless you Milan

“ My admiration and respect for Milan has grown every year, over the 20 years of knowing Milan. He has always been so kind, supportive and approachable. When passing him in the hallways of Delta, he would always stop and speak with you. If he saw you around town, he would make an effort to come say hi. Although he has moved on, he has left a lasting impression on me and so many others. He will be missed!

“ I've worked with Milan at Delta Raleigh since June 1999. Milan was always a kind and humble spirit in the office. Our customers always wanted Milan to be present at the technology summits since his brilliant mind was a wealth of knowledge for where the industry was headed and the type of power savings and wattages could be achieved. He was always a pleasure to be around and his presence will be missed. May you find peace and comfort in the days ahead.

Sandra Bishop - October 20, 2018 at 02:14 PM

“ I have been deeply saddened to hear about Milan passing away from my former student Misha Kumar at Delta. I met Milan soon after I came to NCSU in 2005. It was always good discussing with him - he had the deep practical perspective and he always wanted to solve the relevant problems which made a difference. I was shocked at the news since he came and met us at NCSU just a couple of months ago. His contributions have enriched the power electronics industry and he was a great mentor to many. My sincere condolences to his family.

“ It was just like yesterday when I first met Milan 21 years ago, when I was a 1st year student at VPEC and Milan became my co-advisor. In the first two years when he was still in Blacksburg, we met almost weekly to review my progress. I didn't realize how lucky I was to have such a great mentor, leading me to the world of Power Electronics, with his great experiences, patience and great heart... Time passed by quickly. Even later his lab moved to Raleigh, even a few years later I left for California, after that I only got to meet him once every few years, I never felt he was really far away.

Then here comes this sad news that he suddenly left us. It is just so hard to accept that. I still feel he is there, somewhere, ready to give me some advice ... He will be in our memories forever.

“ Dear Milan,  
It is really a pleasure of working together with you in Delta for so many years and always thought you as my mentor. I really appreciate your support and personal friendship.  
May there be comfort in knowing that someone so special will never be forgotten, what a pity I've lost such a great friend and the world has lost a genius in power electronics!

Dear Mrs. Mirjana,  
Our heartfelt condolences go out to you and your family. This has been a tremendous shock on us all.  
Please accept my deepest sympathy and bring my best wishes to your family.

Respectfully yours,  
JS Huang

“ My wife, Jingzhi, and I are saddened to learn of the passing of Milan Jovanovic. Milan was among the greatest man in the world as a guru, a colleague and a friend. Our relationship started about 20 years ago when Milan and I both worked for Delta Electronics. We quickly became the best of friends that shared a common interest, how we loved and devoted in the power electronics. We would always discuss the details of technical problems at work. His intelligence and kindness made a lasting impression in my memory.

Today, the world has lost a genius in power electronics and we have lost a respected colleague and a close friend. However, Milan was able to leave us with his great knowledge and experience through his books and papers that will continue to guide us as we move forward towards the pinnacle of success of power electronics.

Jingzhi and I send our thoughts and prayers to Milan's wife, his family and all those who loved him.

“ Like many people at Delta, I know Milan as a good friend, a great colleague and a passionate innovator in advanced power electronics technologies.

Milan is one of the key contributors who helped to build what Delta is today, and we all feel a great loss and ache with his passing.

While we bear the loss of him, we carry on his passion to build a better world, a world that is smarter, greener and more energy efficient.

Milan will always be missed and mourned in Delta community for which he had done so much. With my sincere condolences to the entire family of Milan.

“ Lit a candle in memory of Milan Miodrag Jovanovic, a real wise man and power electronics giant

Ming xu - October 18, 2018 at 05:00 PM

---

“ I knew and worked closely with Milan for almost 30 years, starting with his days as a graduate student at Virginia Tech and continuing on through his career at Delta. It was a pleasure to know and work with Milan. He was intelligent, kind, thoughtful, very knowledgeable, very witty with a wonderful dry sense of humor, and a great teacher who was able to concisely and methodically explain very advanced, complex technical matters in a way that made them understandable to less knowledgeable colleagues and customers. He was respected and admired by customers, competitors, friends, and all of his Delta colleagues for his personal qualities and for his major contributions to the world of power electronics.

Engineers are rightly proud of their technical abilities, but sometimes they are reluctant to admit they need help when faced with technical challenges they cannot solve by themselves. Milan was respectful of this aspect of the engineering world, and when consulting on a product development project he was careful to not injure an engineer's pride by offering a technical solution until the engineer was ready to ask for it. It was a tribute to his kind and thoughtful nature that Milan would try to foresee upcoming technical challenges and would create solutions that were put on a shelf and held there until there was a receptive engineering audience to receive them.

I especially enjoyed visiting customers with Milan. His technical knowledge and easy-going manner and wit made these visits a pleasure, and in many ways he was Delta's best salesperson when it came to cementing a relationship with engineering customers on highly technical matters.

His dry and very humorous wit always came through on these visits, both when with customers and when it was just the two of us traveling together. I especially remember an early morning breakfast at a hotel coffee shop near Boston when we

were on a tight schedule for a morning meeting with a customer, and the breakfast took 45 minutes to be served. Milan was getting very impatient but kept his cool. When the food finally arrived, the waitress was very apologetic and said the breakfast would be free. Without a moment's hesitation, Milan immediately said with a straight face, "and what about the room rate?" I burst out laughing. This was Milan's quick wit at its finest.

Rest In Peace, Milan. You will truly be missed by all your friends and your family.

“ On behalf of Delta's IP team, I would like to express our condolences to Dr Jovanovic's family. Many of us knew Milan personally, and we were all saddened to hear of his recent passing away.

Dr Jovanovic was a distinguished leader in the field of Power Electronics. His continuing pursuit of technology advancements was always an inspiration to Delta's engineers and inventors. He was the first person to be presented with the Delta Innovation Award category for "Outstanding Contribution" to Intellectual Property, one of numerous recognitions for his innovative achievements.

Milan was a strong supporter of Intellectual Property, and is well-respected among our IP team for his inventiveness and capacity to innovate beyond state of the art. His absence will be missed by our IP team, and is a great loss to Delta's inventor community.

Again, we extend our deepest sympathy, and our thoughts are with Milan's family in this difficult time.

Sincerely,  
C. P. Ting

“ Mrs.Jovanovic, Maria, and Max,

His remember will live forever. My heart breaks for you all.

I have to share something about Mr. Milan,  
Our Grandson Carter was Born with a very rare blood disease called Fanconia Anemia he was 18 months old, he is now 12, Mr. Milan words where always how is Carter and the family , and I would answer him and his words was Don't Give Up.

Many times I would walk away crying because it was hard to talk about it, but when I would see him again later on, it could be months or weeks, he would say Don't Give Up.

And One Day he stop and said Hope Is On The Way, and you know It was people like him that would always give us encouraging words that would carry us through another day or weeks or even months. By just saying Don't Give Up.

So please take this time and remember all the amazing times you have had together and remember all the love that he showed to so many people that he worked with and to take the time out of his busy times to stop and say Don't Give Up. This will always be in my family's heart forever. He was a Blessing to many and still is.

May God bless you all and know we will continue to pray for strength for you all

“ He has gone gently, without taking anything away, but has left a huge impact on all of us and the whole power electronics world. Dear Milan, I will miss you forever in my heart!

Dongbin Hou - October 16, 2018 at 02:52 PM

“ Milan,

Still remember all the days that I spent in the Delta Research Lab, with you as my Ph.D co-advisor. Still remember all the coaching guidance and kind words. Still remember all the laughter we had when meeting at last year's CPES reunion. You'll always be remembered and missed as a patient teacher, a wonderful mentor and a great friend.
