“ Will was a great friend and co-worker. He was a driving force in me getting through my cancer. I think of him everyday and he will always be missed. RIP my friend

“ Will was a brain at crunching data, both in his computer and his brain. I agree with Don; Will was the structural and founding member of crime crunching data style at the CCSO. He could take a set of crime stats and pick things out no one else could see. He taught me several computer programs and I learned so much from him. We shared a love of photography and had many nice discussions about things he'd love to see and photograph. RIP Will and may God bless all the family and friends.

“ Anne and Christina, my heartfelt condolences on Will's death ... Will Sargent served with distinction as our intelligence and crime analyst supervisor; he was responsible for creating a sharp focus on crime for the Collier County Sheriff's Office ... I recall after a series of vehicle break-ins at our beaches he was able to successfully analyze the crimes, develop a pattern and facilitate the placement of our SWAT team literally behind the bad guys car when they returned to Naples to commit another series of break-ins ... we caught the violators that day while they attempted to enter the first of what they hoped to be a large number of victims' cars ... just one of many accomplishments that created the early intelligence led policing model at CCSOS ... Will deserves credit for helping to create one of the best sheriff's offices in the state and likely the country relative to crime prevention through proactive and aggressive enforcement ... God speed, Will ... Don Hunter, Sheriff (retired) Collier County, Florida
