

Michael Seth Melbourne Bereman

July 3, 1981 - March 17, 2021

Michael S. Bereman born July 3, 1981 of Apex, NC passed away peacefully at home on March 17, 2021 surrounded by his loving wife, family and friends. Michael bravely battled Amyotrophic Lateral Sclerosis (ALS/Lou Gehrig's Disease) for 6 years.

An Apex native, Michael attended AV Baucom Elementary, Apex Middle, and Apex High Schools (graduating class of 2000). While he was an avid athlete and sports fan, his greatest love was the game of basketball, playing from the age of 4 with his older brother Matthew all the way to varsity basketball at Apex High School, which was one of his fondest memories. His formative years were truly shaped by his “small town” community and playing sports which yielded relationships with friends, teachers and coaches that would last a lifetime.

Michael was a lifelong Wolfpack fan, proudly earning his BS in Chemistry with a minor in Mathematics in 2004 and his PhD in Analytical Chemistry in 2009, both from NC State University. He would then continue to the University of Washington in Seattle for a postdoctoral position in the Genome Sciences department while he and wife Meagan enjoyed life as newlyweds in the Pacific Northwest for several years.

A faculty position at NC State University in 2013 would then bring Michael

back to the east coast and his alma mater to start his dream job in the College of Sciences and begin his own family where he was raised. Michael's doctoral and postdoctoral research was shaped by biomarker research for many diseases, but it wasn't until his own diagnosis of ALS in 2015 would his focus forever be changed. Michael quickly became a giant in the field of ALS research and enjoyed sharing his passion for science with his students, where their work together would be published in top tier journals. His collaborations as a tenured Associate Professor and University Faculty Scholar would forge relationships around the world. He was awarded prestigious grants from the Department of Defense, the national ALS Association and other elite universities and research institutions to continue his pursuit of novel and dedicated research to ultimately find a cure for ALS. The Bereman's family motto was shaped by Coach Jim Valvano's famous quote, "Don't give up. Don't ever give up!" and Michael lived by these words. He worked furiously right up to a few days before his passing by utilizing his eye gaze computer technology.

Michael's passion and drive for life was evident in all that he did and all whom he loved and held close in his life. May we all continue to never give up and fight with each earthly breath to make a difference and change the world, just as he did. We are forever grateful for his mark left on our hearts, and the legacy left in his beloved children Mason and Millie who will surely follow in their Daddy's footsteps of always being "Bereman Brave".

Michael is survived by his loving wife Meagan Myers Bereman, children Michael Mason, and Millicent Middleton, adoring parents Dr. Robert Deane Bereman and Barbara Jo Melbourne Bereman of Apex and beloved brother Dr. R. Matthew Bereman (Julie) and nieces Madelyn Mae and Aubrey Rose of Fuquay-Varina.

Due to covid restrictions, a private ceremony will be held at Apex United Methodist Church. An outdoor celebration of life is planned for June 26, 2021.

All who loved Michael are invited to participate in our summer date.

Donations in honor of Michael's life well lived can be made to the ALS Association of NC, or ALS TDI (ALS Therapy Development Institute).

“ Living with ALS has been one of the hardest challenges of my life. The muscle weakness, fatigue, and gradual loss of mobility were heartbreaking. Conventional treatments offered little more than temporary comfort, and I was starting to lose hope. That’s when I discovered NaturePath Herbal Clinic. Skeptical but desperate for relief, I decided to try their herbal therapy. To my surprise, by the fourth month, I began noticing steady improvements less muscle twitching, better coordination, and renewed energy. It wasn’t an overnight miracle, but the progress felt real. For the first time in a long while, I felt a sense of control returning to my body. Today, I move more freely, sleep better, and most importantly I feel hopeful again. This journey with NaturePath has been life changing. If you or someone you love is battling ALS or any other neurodegenerative condition, I genuinely encourage you to explore natural alternatives. You might be surprised at what’s possible. I’m truly grateful I gave them a chance. www.naturepathherbalclinic.com

“ My first ALS symptom occurred in 2016, but was diagnosed in 2018. I had severe symptoms ranging from shortness of breath, balance problems, couldn’t walk without a walker or a power chair, i had difficulty swallowing and fatiue. I was given medications which helped but only for a short burst of time, then I decided to try alternative measures and began on ALS Formula treatment from Aknni herbs centre, It has made a tremendous difference for me (Visit ww w. [aknniherbscentre.c om](http://aknniherbscentre.com)). I had improved walking balance, increased appetite, muscle strength, improved eyesight and others.

“ My husband has Bulbar ALS, he is about 63 years old it was diagnosed 2 years ago. It was getting more difficult to live for him, because of stiff muscles he couldn't even move. Riluzole and tofersen medicines were given, but didn't give much relief. He couldn't eat food without choking. I thought this might be the last stage and the medications he was given did not help at all, so I started to do alot of research on Ayurveda treatments, I was introduced to Natural Herbs Centre and their ALS/MND Ayurveda Protocol. He started on the Ayurveda Treatment last year, his symptoms gradually diminished including his vocal cord spasm, Muscle Weakness, speech and Difficulty with swallowing. Reach them at naturalherbscentre.com , he is getting active again since starting this treatment, he is able to walk again (down the street and back) he has also resumed exercising to strengthen muscles and lo longer require a feeding tube!! God Bless all ALS Caregivers. Stay Strong, take small moments throughout the day to thank yourself, to love your self, and pray to whatever faith, star, spiritual force you believe in and ask for strength. I can personally vouch for these remedy but you would probably need to decide what works best for you.

“ How well I remember Michael’s keen intellect, dry wit, and classic good looks from his days in my Senior English class at Apex High. I’m so sorry for your loss.
