There were important things in Tim's life – his wife of 21 years (the love of his life), his family, his church, his music ministry (bionic.band; his music is available on Youtube; art work, and community outreaches.

Tim was very talented in music and art plus very athletic having run in cross-country and track during his high school years. School for Art and graduated with honors from high school. He achieved a BA in art and graphic design in college.

Tim was multilingual having spent time in Germany when his Dad was stationed there. The family always sought him out when needing a translation.

Tim was a dedicated USPS employee loving those with whom he worked and those whom he served on his rural mail route.

The family would like to express deep gratitude to his Oncologist, Dr. Robert M. Graham and all the staff at Middle Tennessee Oncology Center and the medical staff at Erlanger Medical Center. Tim appreciated his Dr's care more than words can describe.
